Table of contents

KNX Touch Panel	KNX touch switch
KNX Actuator	KNX analog outputs
KNX binary outputs	KNX heating actuators
KNX shutter actuators	KNX multi-function actuators
KNX switching actuators	KNX Electricity Meters
KNX UP actuators (flush-mounted)	KNX analog inputs
KNX motion detector	KNX binary inputs
KNX brightness sensors	KNX Hygrometer
KNX presence detector	KNX push button interfaces
KNX temperature sensors	KNX DALI Gateway / Broadcast Interfaces
KNX dimmer / KNX dimming actuators	KNX Energy Saver
KNX climate control / KNX heating actuators	KNX air conditioners
KNX fan control	KNX Room Controller
KNX RF Sensors	KNX RF Accessories
KNX Interfaces	KNX System
KNX Accessories	Presence and motion detector

KNX Touch Panel

Our KNX touch panels are recommended for their elegant design and great functionality. Reliable and durable KNX touch panels for every project. Fusion of design and technology for highest demands.

KNX analog outputs

KNX analog outputs are important components of an automated and precisely controlled smart home. The functionality of the KNX analog outputs is well thought-out and can be implemented cleanly. The KNX analogue outputs are system-integrated and functionally reliable.

KNX binary outputs

KNX binary outputs for reliable building automation. Our KNX binary outputs impress with their outstanding quality and amazing design. In addition, the materials are extremely robust and powerful. Ambient temperatures of up to 45 °C do not damage the materials. Even low temperatures of just below 0 °C are absolutely harmless. In addition, the material does not condense even at high humidity. Convince yourself of top quality in a class of its own.

KNX heating actuators

The new standard for your home automation: KNX heating actuators. As the successor to the former fieldbuses, KNX is a technical advancement. The addition of configuration mechanisms and transmission media simplifies and improves your control system in line with the times. The KNX heating actuators are easy to use and fully functional to meet your requirements for perfect building technology. Extend your heating system with your top-class KNX module for reliable indoor heating.

KNX shutter actuators

With our KNX shutter actuators you reliably control the shading in your building automation. By using blind couplers, you can also control blinds and blinds with 12/24VDC with KNX blind actuators.

KNX multi-function actuators

KNX multi-function actuators combine different functions / subsystems on one KNX actuator. This modern KNX switch makes the control of a KNX installation more functional. Our components are perfectly matched to each other and enable optimum operation of your system.

KNX switching actuators

With our KNX switching actuators you can reliably control your home automation. The switching actuators are characterised by the fact that they can be used in many ways in your KNX project. Many of the KNX switching actuators can be used as KNX multifunction actuators. The KNX actuators each have multi-function outputs. Various models also have analogue/digital inputs, which allows you to calculate your project even more efficiently.

KNX UP actuators (flush-mounted)

The KNX flush-mounted actuators are intelligent components in your building system. Reliable fabrication and functionality are guaranteed by many years of development. The KNX flush-mounted actuators are particularly suitable when there is no more space in the control cabinet or when the actuator has to be installed close to the end point.

KNX motion detector

Practical and indispensable - the KNX motion detector. If you have one, you never want to do without it again, and if you don't have one, you should get one as soon as possible. Of course, we are talking here about KNX motion detectors, which should no longer be missing in any building.
